CARRIER OBJECTIVE

To work for an organization which provides me the opportunity to improve my skills which i can use for achieve organizational objectives.

PROJECTS

Waste Assay Monitor, Tianwan Nuclear Facility, China
Team leader for whole part of software and integration between software and hardware

WAM-200 series monitors are designed for quantitative and qualitative characterization of radioactive waste with total activity up to 1 TBq in a barrel

Free Release Monitor, Chernobyl Nuclear Power Plant, Ukraine
Main developer for the key part of the software, calculations integration and design database

A comprehensive monitoring equipment for measuring the activity of radionuclides in waste materials before they are released into the environment.

Control System for the Calibration Laboratory, Worldwide
Developer for part of the application for general communication with hardware

The control system for the calibration laboratory is a complete system designed for the overall operational provision of calibration laboratories that provide ionising radiation instrument calibration.

Working hours calendar
Main and only one developer for project project when I wanted to try the whole lifecycle of the application for OS Android

The application serves as the smart electronic alternative to the classic paper planning calendar, which is well known from diaries.
